Acknowledgements

We would like to acknowledge Simons Foundation International for their support through the BIOS-SCOPE award to Craig Carlson. We thank REU interns Gabriel Schuler and Sarah Amiri for their help with initial data collections (through NSF REU-OCE 1262880 and 1460686 awarded to Rachel Parsons), and the Canadian Associates of BIOS for their support of Katelyn McLeod and Miguel Desmarais. We wish to thank the crew of the R/V Atlantic Explorer, the technicians in the BATS Program for sample collection, and the BATS Program at BIOS for funding the high-resolution bacterioplankton abundance and oxygen measurements through NSF awards to Rodney Johnson.
